Front-end Web Developer with a BSc in Web Development and hands-on experience delivering tailored web solutions across a diverse range of industries. In my current role I specialise in translating client goals into high-performing, user friendly and mobile responsive websites.

EXPERIENCE

Web Designer and Developer, Make A Difference Marketing | Liverpool

AUGUST 2025 - PRESENT

ACHIEVEMENTS:

- Led the website redesign for a sister company, refreshing the design and UX to better align with a major business model restructure.

RESPONSIBILITIES:

- End-to-end development of websites across a diverse portfolio of projects.
- Develop and launch custom Wordpress and Shopify builds, ensuring mobile responsiveness and SEO best practices.
- Design comprehensive website mockups, merging modern designs with intuitive navigation.
- Conduct stakeholder interviews to best determine technical and aesthetic requirements for new builds.
- Perform monthly SEO audits of select websites, optimising performance by enforcing HTML semantic standards, managing file sizes, and monitoring backlink health.

Client Services, Sunshine HQ | York

MARCH 2018 - DECEMBER 2018

RESPONSIBILITIES:

- Implemented design modifications to client website templates using HTML and CSS.
- Maintained websites and online releases for international music artists.
- Managed client accounts and provided software support for proprietary CMS.
- Contributed to a sales initiative that boosted weekly product engagement.
